

ADCM SERIES HEAT TRANSFER MACHINES

Our exclusive “ADCM” Series Machines are designed for extended production use and are expandable for future production needs. These “ADCM” Series Machines are engineered to allow our customer to add additional features such as “Auto Die Cut Label Feeding” depending on machine model. All our “ADCM” Series Machines can be returned to us for upgrading to accept Roll Label Feeding as needed.

Altena Machine Builders, Inc. has developed a line of heat transfer application machines for rolled label products. These “ADCM Series” machines were designed and are manufactured by Altena Machine Builders, Inc. specifically for application of heat release transfer labels. These machines provide our customers with a consistent and precise label applications time after time. Machine controls are user friendly, easily adjusted and relatively maintenance free. The pneumatic system, with independent air regulators and flow control allow precise label application pressures. Required machine adjustments are simple. Maintenance is minimal with all vital areas completely accessible for your technician.

Air requirement: 60psi. Power requirement: 110 volts: 9.2 amps/883 watts. 220 volts: 5.4 amps/894 watts.

Find out how easy it is to improve label application quality while increasing production using our exciting line of quality ADCM Series heat transfer label application machinery. Requests for custom modifications will always be welcome.

User Friendly Controls

Optical Two-Hand
Control Switches

PLC Logic Control System

Heating Block size
(5” x 5”)

Presser Heads - Interchangeable
(Shaped dies)

Fixed Lower Anvil Plate
(With Silicon Rubber Pad)

Laser “Cross Hair”
Generator

Air Cylinder
(2” br X 3” str)

Independent Air Regulators
for Precise
Label Application Pressures

110 or 220 volt
available

ADCM 60 SERIES

Expandable for
Pick and Feed
Roll Label Feed
Applications

Options:

Pick and Feed Cut Label Unit, Roll Feed System, Additional Presser Heads, Garment Deck
