

# ALTENA HEAT TRANSFER MACHINES

Altena Machine Builders, Inc. has developed a line of heat transfer application machines for Die Cut label products. These “ machines were designed and are manufactured by Altena Machine Builders, Inc. Specifically for application of die cut heat release transfer labels. These machines provide our customers with a consistent and precise label applications time after time. Machine controls are user friendly, easily adjusted and relatively maintenance free. The pneumatic system, with independent air regulators and flow control allow precise label application pressures. The Heat Block slide system is finely balanced ease of motion with minimal effort and is almost maintenance free.

These Two Station Models are designed to provide longer application times while allowing continuous production output. The operator can load garment in one station while the application of the label is being performed on the other station. Machine maintenance is minimal with all vital areas completely accessible for your technician. Air requirement: 60psi. Power requirement: 110 volts: 9.5 - 11 amps and 900-1200 watts. 220 volts: 5.5 - 9.0 amps and 850 - 1200 watts. Actual power usage will be determined by heat block size, number and wattage of Heater Cartridges and voltage.

Find out how easy it is to provide quality label applications while increasing production using our exciting line of quality Altena Heat Transfer Label Application Machinery. Requests for custom modifications will always be welcome.

## 2 Station “SLIDE” Series Die Cut Application Machine

### User Friendly Controls

Bearing Mounted  
Heat Block Slide System

Optical Two-Hand  
Control Switches

PLC Logic Control System

Heating Block size  
(Dependant on Application)

Fixed Lower Anvil Plate  
(With Silicon Rubber Pad)

Independent Air Regulators  
for Precise  
Label Application Pressures

110 or 220 volt  
available

Options: *Larger Heat Blocks, Free Standing Models, Laser Cross Generators and Counter*
